

CAREER OPPORTUNITY

Job Title **Senior Back-End Developer**

Email your CV: info@logi-ka.net

We @ Logika (currently in stealth mode) are seeking a hands-on JEE guru to join our team. Logika, an innovative technology start-up located next to Kanyon in Levent, is founded by a team of seasoned entrepreneurs. Our passion is re-inventing the transportation ecosystem with the ultimate goal of making things more efficient, sustainable and more fun. We are seeking a rock star developer who will be part of executing Logika's mission through bringing our product vision to life.

The ideal candidate has a strong background in Back-End development, especially in JEE, with a track record of having built popular apps coupled with technical accomplishments. The candidate possess an entrepreneurial drive, a demonstrated ability to achieve stretch goals in an innovative and fast paced environment and shares our excitement to build a world-class company.

Responsibilities

- Code the server side using JEE using Spring Framework
- Be passionate about developing sophisticated algorithms that solve mega transportation problems
- Regularly document the progress and deliver an exceptionally clean code

Requirements

- Years of experience matter less than demonstrable ability and passion – also a great attitude and personality are must-haves
- Mastery of Java (Spring, JPA 2.0) and OOP
- Scrum / agile / lean methodologies for software development
- Hibernate, Apache CXF, Restful, JSON, Tomcat, Maven, and Subversion

We Offer

Compensation commensurate with experience and will be including a base salary; a performance based incentive plan and a stock option plan.
